## 1. Safety instructions

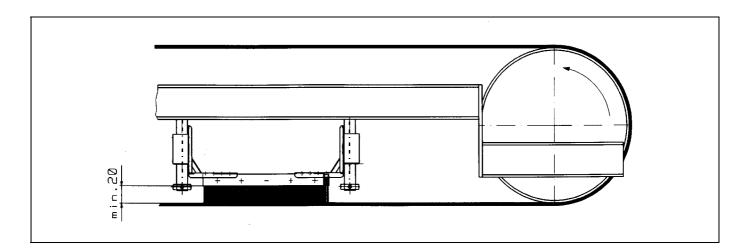

## Working at running conveyor belt is dangerous!

Stop conveyor belt before start of mounting and, if necessary, the inlet in the transfer chute and secure against unauthorized restarting.

#### Observe the regulations for prevention of accidents.

Only trained and practised personnel is allowed in coordination with the individual safety regulations and the mounting conditions to adjust the VIBREX conveyor belt cleaners at running conveyor belt. The control and maintenance personnel has to be instructed according to the safety regulations before the conveyor belt is taken into operation.

# 2. Mounting

Drawing No.: 2.03.3.2557-

- a) Pre-mount Diagonal scraper consisting of angle brackets (Pos.3), U-pofile (Pos.5) and rubber strap (Pos.6) . Emplace scraper as near as possible to the tasil pulley, on the lower belt.
- b) Attach the pipes (Pos.1) at the belt construction according to the local conditions.

Drawing No..: 2.03.3.2556-

- c) Attach pipes (Pos.2) with distance out of schedul to the pipes (Pos.1) at the belt construction.
- d) Push angle brackets (Pos.3) onto pipes (Pos.1 and Pos.2). o not fasten them to the pipes (Pos. 1 and Pos. 2).
- e) Push fixation rings (Pos.4) onto pipes (Pos.1 and Pos.2) and secure them by clamping screws against falling out or displacement of the diagonal scraper.
- f) Diagonal scrapers are mounted floating and therefore the cleaning effect has to be observed and, if necessary, apply weights to achieve a higher weight load and by this a better cleaning effect.

# **Wearing limit**

The distance between upper edge of lower belt to lower edge of U-profile (Pos.5) must be at least 20mm.

#### 3. Maintenance

According to general experiences with sophisticated machine elements the following maintenance cycles should be observed and, if necessary, adapted to the operational requirements:

- a. Weekly inspection and checking of the fixing elements.
- b. Monthly inspection and checking of the fixing elements.
- c. Quarter or half year checking of the final wear date and, if necessary, exchange or preliminary exchange of the wearing elements.

## 4. Spare and Wear Parts

according to part list in drawing No. 2.04.4.2557-

### 5. Drawings

The following drawing nos. belong to this documentation:

2.04.4.2556-2.04.4.2557-2.03.3.2101-2.03.3.2102-2.04.4.2560-

## Technical modifications reserved
